IS BLOCK ISLAND OUTSIDE THE THREE-MILE LIMIT?

In the United States district court in Providence on Monday in the case of Capt. Archie S. Wentzell of the British schooner Marina, charged with possessing and transporting 1,000 cases of liquor, the contention that Block Island is outside the three-mile territorial water of the United States was raised by Attorney Daniel A. Shea, counsel for the accused.

Judge Brown suggested that the case proceed and during the trial arguments would be heard on the question of whether Block Island is within territorial waters of the United States.

Assistant United States District Attorney Harold A. Andrews, in prosecuting the case, maintained that the island is part of the state of Rhode Island and therefore part of the mainland of the United States.

The Marina was seized Aug. 12 at 1 p. m. off Block Island by the Italian, Newport and Providence, in the collision Saturday evening at the state pier at Providence. An inventory showed 775 cases instead of the 1,000 claimed by the government as being carried by the Marina.

It was announced at republican state headquarters that additional facts relating to "assistant attorney general" Spelacy will be released in a day or two.
